Taxonomy

Kingdom	Phylum	Class	Order	Family
Animalia	Chordata	Mammalia	Chiroptera	Molossidae

Taxon Name: *Mops bakarii* Stanley, 2009

Taxonomic Source(s):

ACR. 2014. African Chiroptera Report 2014. African Bats, Pretoria. Available from <http://www.africanbats.org>.

Taxonomic Notes:

This is a newly described species from Pemba Island, Tanzania (Stanley 2008).

Assessment Information

Red List Category & Criteria: Data Deficient [ver 3.1](#)

Year Published: 2017

Date Assessed: April 25, 2016

Justification:

This species is listed as Data Deficient due to only one known locality and lack of further data. Population size is not known.

Geographic Range

Range Description:

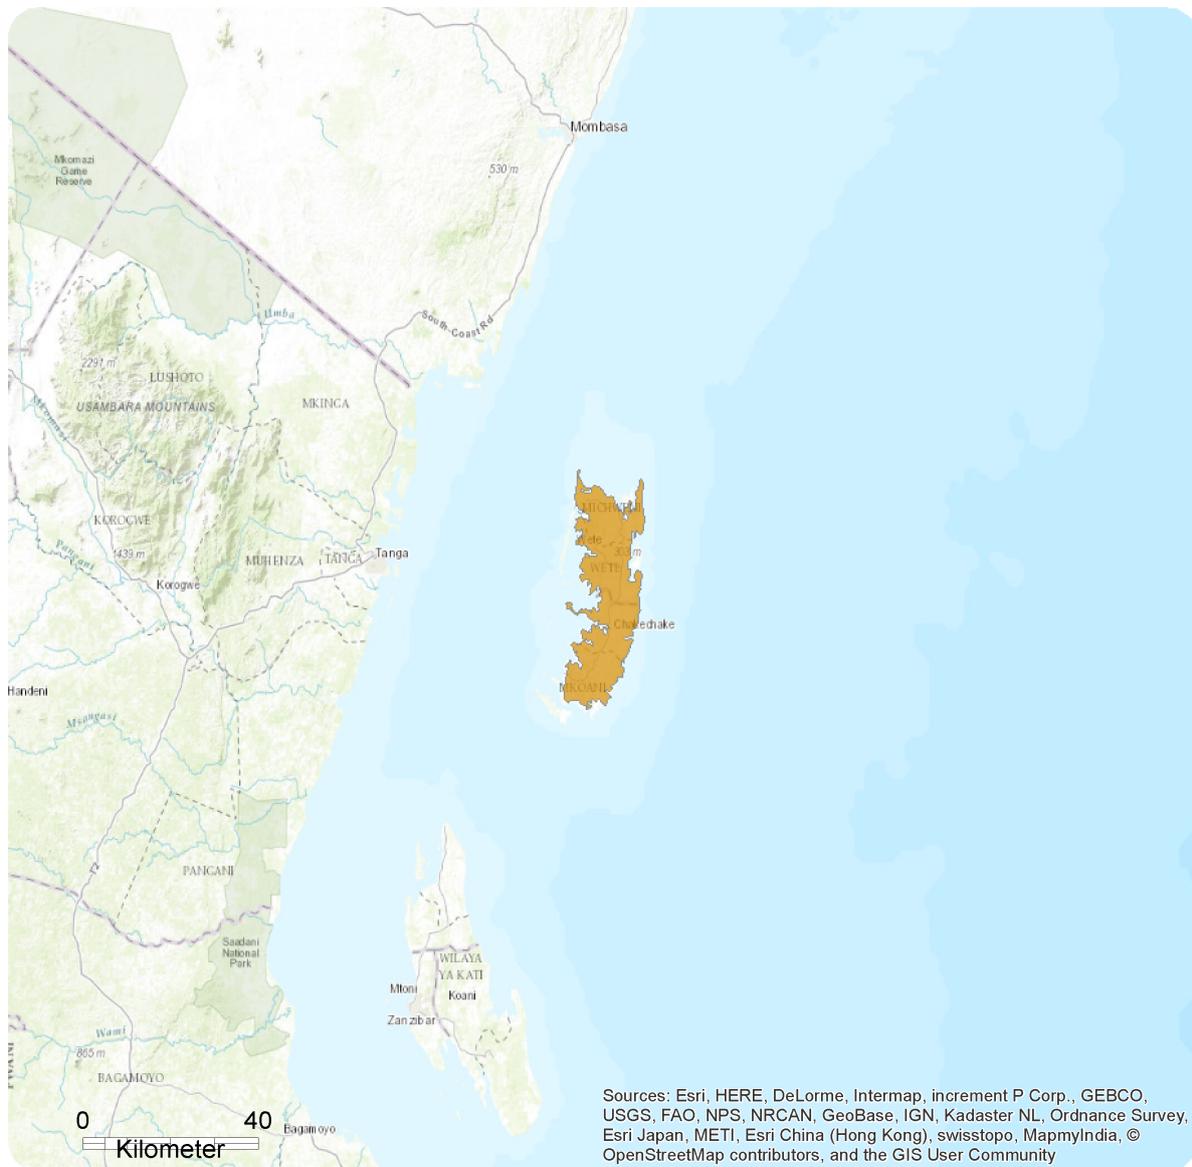

This bat is a recently described species from the Ngezi Forest on the northern Pemba Island, Tanzania. It is not known to occur elsewhere (Stanley 2008).

Country Occurrence:

Native: Tanzania, United Republic of

Distribution Map

Mops bakarii

Range

Extant (resident)

Compiled by:

IUCN (International Union for Conservation of Nature)

The boundaries and names shown and the designations used on this map do not imply any official endorsement, acceptance or opinion by IUCN.

Population

There is no information about *Mops bakarii*'s population size and population trend.

Current Population Trend: Unknown

Habitat and Ecology (see Appendix for additional information)

This bat might be less sensitive to human activity, due to localities being in buildings. The Ngezi Forest, where the type specimen was found, is set within a largely agricultural area. The species roosts in buildings (e.g., in attics). It might also use hollow trees, rock outcrops and sea caves to roost (Stanley 2008).

Systems: Terrestrial

Threats

Specific threats to this species are known at present.

Conservation Actions (see Appendix for additional information)

There are no specific conservation measures in place for this species.
